**Nuance de haute technologie pour
un tournage efficace des fontes**

**Plaquettes également adaptées au
tournage de l'acier désormais disponibles**

**La toute dernière technologie de
revêtement lisse qui garantit
des coupes stables et fiables**

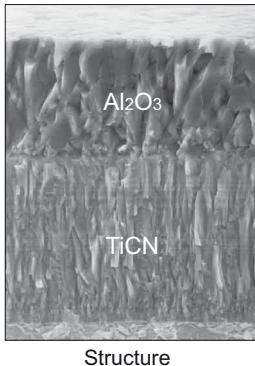

Nouvelle nuance revêtue CVD pour tournage de fonte et fonte ductile

UC5105/UC5115

Caractéristiques

Nouvelle technologie de revêtement “All-Black Super-Even Coat”

Amélioration de la résistance à l'usure

Résistance à l'usure accrue grâce à l'épais revêtement Al₂O₃ (oxyde d'alumine) et à la couche TiCN (carbonitrate de titane), fibreuse et résistante.

Augmentation de la résistance à l'écaillage

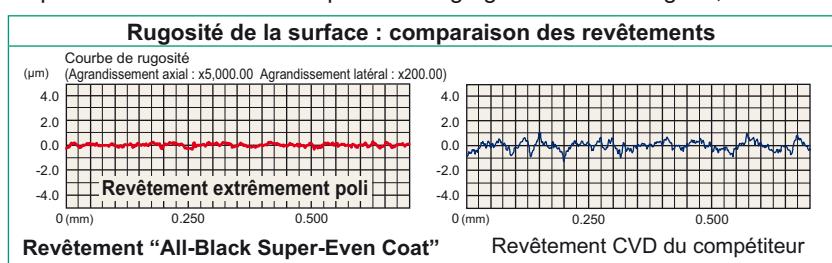

La surface du revêtement ainsi obtenue est homogène et lisse. Elle évite l'arête rapportée et l'écaillage de l'arête, assurant ainsi une coupe fiable et stable.

UC5105

Pourvu d'un substrat de carbure très dur et du revêtement “All-Black Super-Even Coat”. Efficace pour le tournage à grande vitesse de fonte grise et de fonte ductile.

UC5115

Pourvu d'un substrat de carbure très tenace et du revêtement “All-Black Super-Even Coat”. La première recommandation pour tournage général de fonte grise, de fonte ductile et de l'acier.

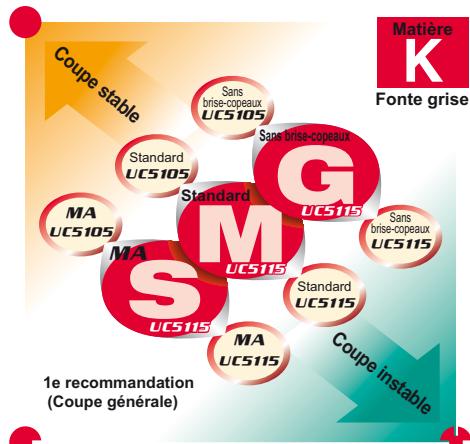

Plage d'applications et conditions de coupe recommandées

● SYSTEME TOOL NAVI

UC5105 avec grande résistance à l'usure pour tournage continu et à grande vitesse

UC5115 avec un excellent équilibre de dureté et résistance à l'usure. Convient également parfaitement au tournage continu à grande vitesse de l'acier avec une longue durée de vie.
